VINNER OF THE FIRST PRIZE

While reading the record of the testing of some beetroot harvesters at the recent show at Victoria Park, it was much to the satisfaction of all to learn the result obtained by the Massey-Harris, which came in first. It is well known that beetroot harvesting is a more or less annual event, and the competition among harvesters is keen. In Victoria, quite a number of beetroot harvesting machines have been turned out during the last few years and the work will soon be carried on in the same way as it is in other parts of the world. The Massey-Harris has been highly commended for its ease of operation and its ability to stand up to hard work. It is a strong machine, well designed, and will give many years of service. The fact that the加持者 was first prize is a good indication of the quality of work that can be expected from this manufacturer. This is a machine that is sure to be a success and will meet with the approval of all who use it. It is a strong competitor in the field and will give much satisfaction to those who use it.
