ROMANCE OF THE ROAD THAT LEADS TO DARWIN
An Australian Achievement Against Time and Nature

By "GUNNER"

The full story of what has taken place on the far north in the way of advancing Australia's military organisation cannot be told without saying that there will be a fascinating chapter to be written for any official history. Much of the subject matter inevitably will concern "The Road"—the new all-season highway commenced to open time by the State Governments of New South Wales, South Australia, and Queensland on behalf of the Commonwealth Government.

Before discussing any of the events that have occurred on this road, however, it is necessary to discuss the nature and purpose of the road. It is probable that the road is the finest of its kind in Australia, and even one of the finest in the world. It is the best road ever designed, and the best road ever built. It is superior to its equals in all respects, and is so designed and constructed as to be able to stand up to the severest weather conditions and the greatest use.

The road is the first of its kind in Australia, and is so designed and constructed as to be able to stand up to the severest weather conditions and the greatest use. It is the best road ever designed, and the best road ever built. It is superior to its equals in all respects, and is so designed and constructed as to be able to stand up to the severest weather conditions and the greatest use.
