**How a Shilling Grows.**

One shilling per week deposited regularly in the Commonwealth Savings Bank will, in 15 years, tend to a total of £40 which is provided that the deposit is regular and the interest is allowed to remain in the Savings Account.

Here begins the red period. In the example you deposit only a little over 42s. The Commonwealth Savings Bank provides the balance in compounded interest—over one-third of the total.

Life's money earns no profit. Set your savings to growing as well as across wasting.

(Certified by the Common Wealth Government.)
