R.A.F. SMASHES GERMAN ATTACKS NEAR MURMANK

Help Russians To Hurl Nazis Back 10 Miles

LONDON, September 25—The R.A.F. has been in action at Murmansk. Teasing into attacking strikes and Massamrotchits, they drove them off and allowed the Russians to throw the Germans and Austrians back 10 miles behind the Liza River.

In addition, squadrons of British planes are reported to be helping the Russians to inflict serious losses on the Germans in the Leningrad sector, where intensified air attacks are being made on Nazi bases and troops. These offensive operations are continuing despite RAF efforts to drive off heavy rain, which is said to be falling all along the whole sector.

A further attack mentioned by Moscow is that Soviet fighters forced the Germans to retreat when they attempted to bomb Mosco.
The Stockholm correspondent of "The Times" says that both sides are fighting in the Russian sector and the ground has become a mass of snow fields, trenches, and guns. But the date or extent of the battle is not given.

Tank Unit Smashed

RUMANIANS DIE IN FLOOD

LONDON, September 25—The London correspondent of "The Times" says that both sides are fighting in the Russian sector and the ground has become a mass of snow fields, trenches, and guns.
