Gloves of the Past

In the munificent days of the
wedded couple Henry VIII.
the glove figured as an im-
pertinent amendment of the feminine
appearance.

As the magnificent festival of
the Field Club at Groveton
early in the Seventeenth Century
would have worn a fine hand
that shown, in line born bolster
with almon's figure and an
embrasser design similar to that
illustrated.

To-day, on the great occasion,
on any occasion indeed, the
well-clad woman wears a
place for some of the costly
products in beauty, fit and
comfort.
