The Sydney Mail, Saturday November 26, 1892.

Brisbane—Past and Present.

(Continued from page 112.)

North Circuit was the principal entrance to the port, and south街道。 The causeway was bordered with tall trees, and the roadway was shaded by tall trees and bushes. The bridge at the head of the causeway was built in a graceful style, with a large archway supported by stone columns. The bridge was painted a dark brown color.

Brisbane, the capital of Queensland, is one of the most important cities in Australia. It is situated on the north-north-west coast of Australia, and is a port of entry for goods from all parts of the world. The city is connected with the continent by a railway, and is connected with the North Circuit by a steamship, which runs twice a week. The city is well supplied with water, and has a good supply of gas. The city is surrounded by a belt of hills, which are covered with a dense forest of eucalyptus trees.

The Brisbane River, which flows through the city, is navigable for a distance of 150 miles. The river is well supplied with water, and is navigable for steamers of all sizes. The river is bordered by a belt of woods, which are well shaded by tall trees and bushes.
