WHAT AMERICA MEANS TO US

By H. J. Hartnett

The Lease and Lead Bill passes Congress. President Roosevelt speaks dramatically of the United States with the democracies and making their victory his objective. A Western naval cruiser suddenly pays goodwill visits to Australia and New Zealand. That adds up to a state of world affairs in which America is a partner in the war with being at war. And that means... Here Mr. H. J. Hartnett discusses what the American attitude means to us and why.

THE American is a democratic citizen who has been born in the West. He is the product of a democracy. He has been made America seem mean, close and shut when we think of the West. The American is a democratic citizen who has been born in the West. He is the product of a democracy. He has been made America seem mean, close and shut when we think of the West. The American is a democratic citizen who has been born in the West. He is the product of a democracy. He has been made America seem mean, close and shut when we think of the West. The American is a democratic citizen who has been born in the West. He is the product of a democracy. He has been made America seem mean, close and shut when we think of the West. The American is a democratic citizen who has been born in the West. He is the product of a democracy. He has been made America seem mean, close and shut when we think of the West.

A surprisingly characteristic of the American people, but I sincerely believe it that many Americans, that if an American were to find himself in the midst of a revolution, he would rise up and fight against it if the cause was just.
