LONGREACH.

(The Times Correspondent.)

Meetings. The Stock Inspector had two cases of foot and mouth disease to deal with last week, and where in both instances the disease was of a migratory condition which obtained last week, and which later in the month of May in the recent chill weather has been much prevalent, the duty of the Inspectors was naturally much increased. The cases were, it is true, only one but they were both acute and in the worst possible condition. The first was at Blackdown, where the disease appeared on the 11th and the second at Culleen, where the disease appeared on the 11th. The same disease has been prevalent in the district of Canowindra and was also reported in the District of Bungall, where the disease was reported on the 11th last week.

The Stock Inspector was present at the district meeting held last week at Bungall, where the disease was reported on the 11th. The disease was reported on the 11th and the second at Culleen, where the disease was reported on the 11th.
