ST. ALOYSIUS COLLEGE CHURCH, SEVENHILL. (Continued)

Reboring-Resleeving
Car-Truck-Tractor
Farm Engine

There is no better equipped workshop in South Australia to do this work. Our plant is the very latest from America, England and Australia.

The van Norman Boring Bar is considered the best money can buy. It removes or reduces Cylinder sizes from 2.0 to 3.0 in. in one way. This range covers nearly all American cars, trucks, tractors, etc.

The Norman Boring Bar is an excellent English machine and handles Cylinder Size from 2.0 to 3.0 in. easily and cleanly. Similar to the best English and Continental high speed power Engines.

The Hercux Piston Grinders are an Australian invention and are quickly and efficiently grinders Pistons to the exact size to fit the cylinders. This work can be done on ROUND grind with equal accuracy and speed. It handles practically all work that is being done by the hand. You will be amazed at the results we can get in the no time. We are the only ones offering this service.

Note—Pistons and rings are in storage in due course and when we have does their business we will give you a round trip to the best and you are not bound to return.

Authorized Lucas Repair Shop and Spare Parts Stocked.
